Getting started is super easy

At MyQuickCloud, our mission is to make remote work effortless and secure — no technical expertise required. Whether you're an independent professional or managing a distributed team, getting started is quick and easy. In just a few steps, you can access your managed server, launch your applications, and connect your team—anytime, anywhere.

Create your MyQuickCloud account

Visit myquickcloud.com and click on Get Started. You'll only need a few details—name, email, and password.

Choose the right plan you need

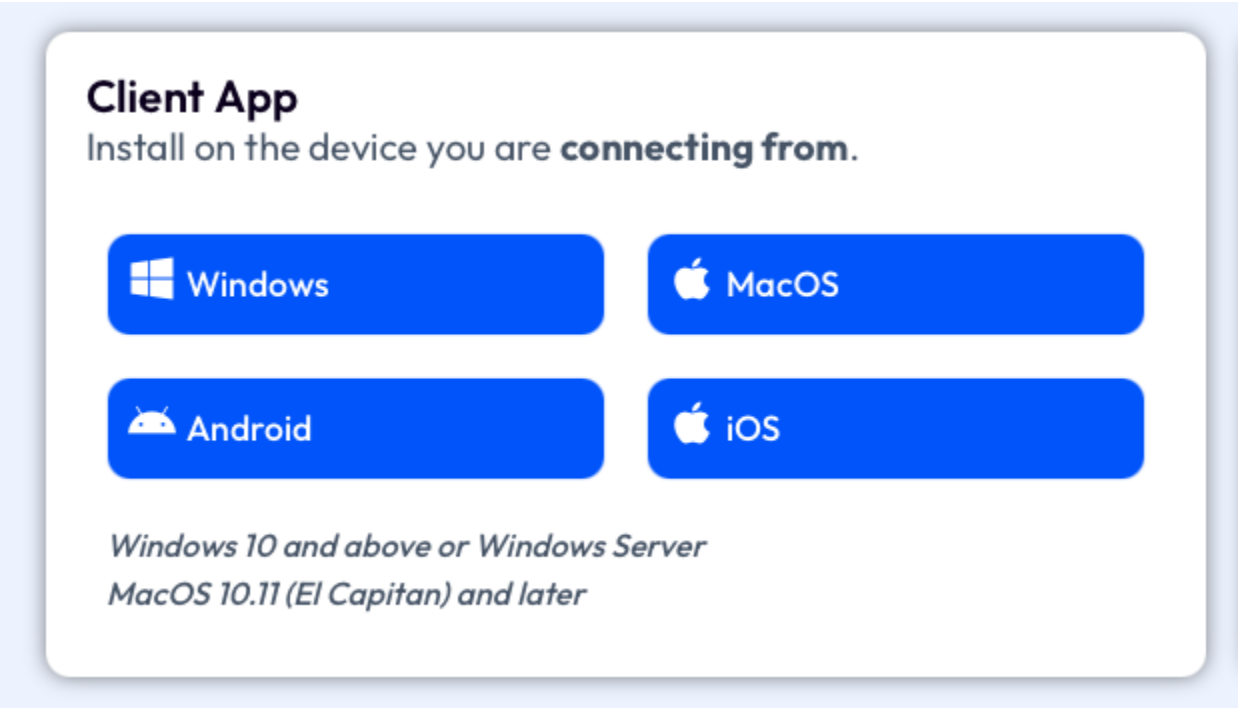
Once signed in, you'll be prompted to select a plan. Whether you're looking to connect to your on-premises PC or want a fully managed cloud server hosted by us, we've got flexible options that scale with your business.

• Managed Cloud Server – We handle everything for you, powered by AWS.
• Remote Access to Your PC – Use your own machine as a secure cloud office.

Bonus: Enjoy a 10-day money-back guarantee on any plan—no strings attached.

Download the MyQuickCloud App

Click below to download the MyQuickCloud App to get the best experience and connect to your server.



Access Your Managed Server or Remote Desktop

Once the app is installed, you're ready to go! If you've chosen a Managed Server, we'll provision it within 48 hours and notify you once it's ready. You can then launch your apps directly from the MyQuickCloud dashboard.

If you're connecting to your own PC, just open the app and click Connect—your remote desktop will be available instantly, with full access to your files and applications.

Ready to work smarter ?

That's it ! In just a few clicks, you're up and running with MyQuickCloud. For more tips and step-by-step video walkthrough, check out our Videos of our website Support section.
